Foreword

Our advanced trading courses share the trading knowledge two seasoned professional traders accumulated over more than 20 years working in financial markets around the world, specially focusing on North America and Europe.

These traders earned an international award for excellence in fund management from Standard & Poors while trading and managing investment funds.

We will pass on to traders and investors going through these professional trading courses our methods and tactics in a simple yet effective way, sharing the vast experience in the area in 2 to 6 months time.

Our offer is comprised of three different and independent professional trading courses:

- **Introduction to Professional Trading**
- **Mature Trading (Long Term focused)**
- **The Advanced Trader (Short Term focused)**

A trader can opt to go through only one of these professional trading courses or all three together for a complete mastery on how to professionally trade financial markets.

Each one of these three consecutive professional trading courses comes with a growing level of trading knowledge and operational know how in financial markets.

Our methods and tactics are turn key trading solutions, whatever your investing timeframe is.

Mature Trading

1: Introduction to the Trading Course

This professional trading course has a special focus on Long Term trading and investing.

The Mature Trading Course is intended for traders or investors that having proven themselves on our first trading course, Introduction to Professional Trading, or throughout their trading careers want to develop themselves into seasoned Long Term traders or investors.

Chapter V – Putting it all together – The Long Term

1: System Design

- Introduction

This System and its Design includes an automated set of mathematical functions superimposed on several Market Timeframes.

This allows a Trader to fully understand what is happening on a particular Market around the World, Contextualize its Trading Environment and then know How and When to approach it when planning Trading Operations, whatever the desired Investment Timeframe is.

This allows for a high degree of efficiency when Analyzing and Trading any Market the Trader chooses to Operate on.

- Guidelines

- A Trader should first understand what a Market is doing on the Long Term Timeframes and only then use Short Term Timeframes to pinpoint the How and When it should be Traded.

This Method allows for a full understanding of a Market' s Trading Context through the observation of its several Timeframes.

Using smaller Timeframes to execute Entries will be more precise on Trading location price wise, allowing the placement of Position Stops that will be smaller in size, thus offering a reduced amount of Risk compared to other Trading approaches.

Adding to your Initial Trading Positions while on an Operation will also be easier using this Method and its line of thought.

- The System' s ideas have been profoundly studied, Back and Forward Tested and evolved over time.

They have been put to the test over the years, its ideas refined to offer the best Market Analysis probability outcome possible.

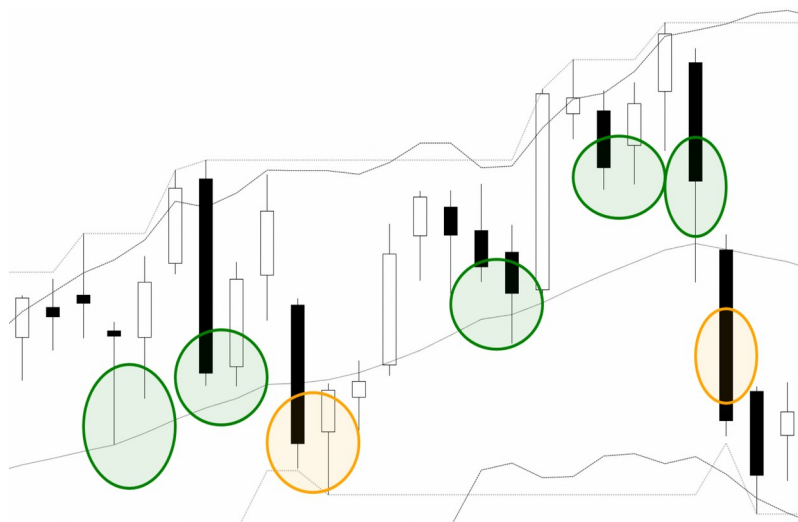

- The System also provides an ideal Trading environment in which any Trader can Operate in Financial Markets, although we recommend liquid Markets.

This approach comes with a full set of rules to help Execute Trading Operations in every Market available throughout the Financial World in a safer and more successful way compared to other Trading Methods.

Mature Trading

1: Introduction to the Trading Course

After having completed this course the trader will have the necessary capabilities to join any professional Trading, Fund Management or Portfolio Management teams around the world, just to name a few, or be on their way to start their own business in the area.

TRADE DIFFERENT PROBABILITIES OF SUCCESS

This course also introduces seasoned trading professionals in the area to a different approach to markets, one often used in North America.

This Long Term approach and its ideas set a very practical way to go about trading, one that is results driven and somehow innovative in so many different ways.

JUST DO IT!

Mature Trading

1: Introduction to the Trading Course

The Mature Trading course includes a revisit to our first professional trading course, Introduction to Professional Trading.

This will allow everyone going through this professional trading course to be on the same page knowledge wise when learning the Long Term trading approach put in place.
